1 We all know that exercise is good for you. However, doctors from the American Medical
2 Joggers' Association under the supervision of Ron Lawrence have recently made some
3 astonishing new discoveries about the effect of exercise on the central nervous system.
4 Last year the team of doctors did a series of tests on some of the competitors in a race.
5 They discovered that during exercise a morphine-like substance is released into the blood
6 system. This proves that exercise can result in a "high" similar in effect to an injection of
7 morphine! This effect lasts for as long as you exercise and perhaps explains why so many
8 people are addicted to jogging!
9 If Dr. Lawrence's theory is correct and exercise can be used as a way of elevating the mind.
10 creative artists should take note as their type of work can often result in long periods of
11 mental exhaustion. Writers and artists such as Oscar Wilde and Modigliani died of drink and
12 drugs before middle age, because they were unable to cope with the depression that occurs
13 after intense creative activity. Sir Laurence Olivier, the actor, does weightlifting for an hour
14 before he goes on stage, because he feels it enables him to give a better performance.
15 He believes that any exercise that moves the body must also move the brain.

1 What is the essence of the new discovery made at the University of California?

- a) Physical exercise has a beneficial effect on mental process
- b) The effect of exercise is unpredictable
- c) Too much exercise is not good
- d) Physical exercise is good for health

2 A series of tests showed that

- a) too much exercise is so harmful as morphine
- b) exercise can have a dangerous result
- c) people's addiction to jogging can be explained scientifically
- d) exercise has the same effect as morphine

3 It can be inferred from the passage that

- a) creative artists should avoid mental exhaustion
- b) writers often die of depression
- c) exercise is especially useful for creative artists
- d) creative activity results in addiction to drinks and drugs

4 Lawrence Olivier did weightlifting for an hour because

- a) he wasn't physically strong enough
- b) he was fond of sports
- c) it helped him to act on the stage
- d) he generally played the parts of superman in performances

5 According to the passage

- a) exercise is equally good for people involved in physical and mental work
- b) too much exercise can have harmful effects
- c) nothing can make people move their brains
- d) the sportsmen are supposed to be the cleverest people in the world
