Հարգելի՛ դիմորդ

Խորհուրդ ենք տալիս առաջադրանքները կատարել ըստ հերթականության: Ուշադիր կարդացե՛ք յուրաքանչյուր առաջադրանք և պատասխանների առաջարկվող տարբերակները: Եթե Ձեզ չի հաջողվում որևէ առաջադրանքի անմիջապես պատասխանել, ժամանակը խնայելու նպատակով կարող եք այն բաց թողնել և դրան անդրադառնալ ավելի ուշ:

Ձեր առջև դրված թեստ-գրքույկի էջերի դատարկ մասերը Դուք ազատորեն կարող եք օգտագործել սևագրության համար: **Թեստ-գրքույկը չի ստուգվում: Ստուգվում է միայն պատասխանների ձևաթուղթը:**

Առաջադրանքները կատարելուց հետո չնոռանաք պատասխանները ուշադիր և խնամքով նշել պատասխանների ձևաթղթում: Պատասխանների ձևաթղթի ճիշտ լրացումից է կախված Ձեր քննական միավորը:

Ցանկանում ենք հաջողություն:

1. Benjamin Franklin is often remembered as a politician and writer, yet his achievements as an
2. inventor were equally **remarkable**. Unlike many inventors of his era, Franklin was less
3. interested in making money from his creations than in improving everyday life. His inventions
4. reflected both his intellectual curiosity and his practical approach to solving problems. Because
5. he constantly observed the world around him, he frequently noticed inconveniences that others
6. simply accepted and then searched for ways to overcome them.
7. One example of this attitude was his invention of bifocal glasses. As Franklin grew older, he
8. became frustrated by the need to switch repeatedly between two different pairs of spectacles:
9. one for reading and another for seeing objects at a distance. Instead of tolerating the
10. inconvenience, he designed lenses that combined both functions in a single pair of glasses. This
11. innovation not only made life easier for him personally but also **transformed the experience** of
12. millions of people with vision problems in the centuries that followed.
13. Franklin's concern for human well-being extended beyond vision. When his brother suffered
14. painfully from kidney stones, Franklin created a flexible urinary catheter that was far more
15. comfortable than the rigid instruments commonly used at the time. Although medicine was still
16. relatively undeveloped in the eighteenth century, Franklin demonstrated an unusually modern
17. belief that scientific knowledge should be applied to reduce human suffering whenever possible.
18. His numerous journeys across the Atlantic Ocean also inspired him to think about safety and
19. efficiency at sea. After observing the dangers faced by sailors during storms, Franklin proposed
20. dividing ships into watertight compartments so that flooding in one section would not
21. necessarily sink the entire vessel. At the time, this idea was considered highly innovative,
22. although it would become standard practice in shipbuilding many years later. Franklin also
23. studied ocean currents carefully and helped map the Gulf Stream, enabling ships to travel more
24. quickly between Europe and North America.
25. Despite his wide range of achievements, Franklin is probably most famous for his experiments
26. with electricity. He did not discover electricity itself; rather, he investigated how it behaved. His
27. famous kite experiment helped prove that lightning was a form of electrical energy. This
28. discovery led him to invent the lightning rod, a simple but highly effective device that protected
29. buildings from fires caused by lightning strikes. Many people at first distrusted the invention,
30. believing it interfered with natural or religious forces.
31. Franklin's inventions reveal a man who combined scientific thinking with social responsibility.
32. Whether he was improving eyeglasses, designing safer ships, or protecting homes from fire, his
33. goal was not personal fame but practical benefit for society. His **legacy** demonstrates how
34. curiosity, creativity, and a desire to help others can lead to innovations that continue to
35. influence modern life centuries later.
