Հարգելի՛ դիմորդ

Խորհուրդ ենք տալիս առաջադրանքները կատարել ըստ հերթականության: Ուշադիր կարդացե՛ք յուրաքանչյուր առաջադրանք և պատասխանների առաջարկվող տարբերակները: Եթե Ձեզ չի հաջողվում որևէ առաջադրանքի անմիջապես պատասխանել, ժամանակը խնայելու նպատակով կարող եք այն բաց թողնել և դրան անդրադառնալ ավելի ուշ:

Ձեր առջև դրված թեստ-գրքույկի էջերի դատարկ մասերը Դուք ազատորեն կարող եք օգտագործել սևագրության համար: **Թեստ-գրքույկը չի ստուգվում: Ստուգվում է միայն պատասխանների ձևաթուղթը:**

Առաջադրանքները կատարելուց հետո չմոռանաք պատասխանները ուշադիր և խնամքով նշել պատասխանների ձևաթղթում: Պատասխանների ձևաթղթի ճիշտ լրացումից է կախված Ձեր քննական միավորը:

Ցանկանում ենք հաջողություն:

Read the text and answer the questions choosing the right answer.

Line number

1. Navigation technology has been essential to human exploration for centuries, enabling
2. people to traverse oceans, deserts and **uncharted** territories. Early methods of navigation relied
3. heavily on natural indicators such as the position of the sun, the stars and the coastline. Ancient
4. civilizations, including the Phoenicians and Polynesians, developed remarkable skills in reading
5. these signs, allowing **them** to travel long distances with surprising accuracy. For example,
6. Polynesian navigators could cross thousands of kilometers of open ocean using only
7. observations of stars, ocean waves and the flight patterns of birds.
8. The invention of tools such as the magnetic compass in the 11th century revolutionized
9. navigation. Originating in China, the compass provided a consistent reference for direction,
10. even when landmarks were not visible. By the late Middle Ages, European explorers combined
11. compasses with maps, astrolabes, and primitive chronometers, creating a system that made
12. long-distance sea voyages more achievable and safer. These developments contributed directly
13. to the Age of Exploration, when explorers such as Christopher Columbus, Vasco da Gama, and
14. Ferdinand Magellan undertook journeys that reshaped global trade and cultural exchange.
15. During the 18th and 19th centuries, further advancements improved navigation accuracy and
16. reliability. The development of accurate marine chronometers allowed sailors to determine
17. longitude **precisely**, reducing the risk of shipwrecks. By the 20th century, radar, sonar, and radio
18. navigation systems had transformed marine and air navigation, allowing vessels to travel
19. safely regardless of visibility or weather conditions.
20. In recent decades, satellite-based systems, such as GPS, have revolutionized navigation
21. once again. These technologies rely on networks of satellites that communicate with receivers
22. on the Earth's surface, providing highly accurate location data in real time. GPS has become
23. vital not only for marine and aviation purposes but also for everyday activities such
24. as driving, hiking and even smartphone-based applications. The widespread adoption of
25. satellite navigation has also had profound economic, military and scientific implications,
26. enabling more efficient logistics, precise military operations and accurate environmental
27. monitoring.
28. Despite these technological advances, traditional navigation skills are still valued,
29. particularly in situations where electronic systems fail. Sailors, pilots and explorers continue to
30. study astronomical navigation, map reading and other classical techniques as a backup to
31. modern tools. The evolution of navigation demonstrates both humanity's ingenuity and its
32. persistent curiosity about the world, illustrating how technological innovation can extend
33. human capability while remaining rooted in time-tested knowledge.

1

Which of the following statements is NOT true according to the text?

- a) 20th-century navigation technologies allowed vessels to travel safely regardless of visibility.
- b) 20th-century navigation technologies were less reliable than the previous ones.
- c) 20th-century navigation technologies made navigation independent of weather conditions.
- d) 20th-century navigation technologies transformed both marine and air navigation.

2 How did compass relate to European exploration?

- a) The compass was only effective for short coastal navigation.
- b) The compass replaced all other navigation tools in Europe.
- c) Combined with maps and instruments, the compass enabled the Age of Exploration.
- d) European explorers invented the compass to facilitate long-distance voyages.

3 The word **uncharted** in line 2 means

- a) unexplored
- b) unbelievable
- c) unusual
- d) unavailable

4 The development of marine chronometers helped overcome

- a) unimportant military navigation methods.
- b) difficulties in determining the height of ocean waves with precision.
- c) challenges in calculating longitude correctly.
- d) the inability to increase the risk of shipwrecks.

5 The pronoun **them** in line 5 stands for

- a) distances
- b) civilizations
- c) skills
- d) signs

6 According to paragraph 4 (lines 20-27), GPS technology

- a) had no impact on everyday activities.
- b) eliminated the need for all traditional navigation skills.
- c) was limited to scientific and military use due to cost.
- d) extended the application of navigation beyond marine and air contexts.

7 The word **precisely** in line 17 is synonymous to

- a) accurately
- b) eventually
- c) approximately
- d) gradually

8 Which of the sentences gives the main idea of the following phrase?

“illustrating how technological innovation can extend human capability while remaining rooted in time-tested knowledge.”

- a) Only new technology determines successful exploration.
- b) Modern navigation completely ignores traditional methods.
- c) Technological progress builds upon, rather than replaces, classical knowledge.
- d) Human ingenuity is limited to testing historical knowledge and innovative techniques.

9

The text implies that technological advances in navigation

- a) have only affected long-distance trade.
- b) have been limited to marine exploration.
- c) have had economic, scientific, and military impacts far beyond exploration.
- d) have replaced curiosity-driven exploration with automated systems.

10

The overall tone of the text can best be described as

- a) doubtful of the value of historical navigation skills.
- b) critical of modern navigation and its reliance on technology.
- c) purely instructional and procedural.
- d) appreciative of technological and historical developments.
